

THINAL DILMITH DEWNAYANA

Software Engineer

☎ +94 712346975 ✉ thinaldilmith2002@gmail.com  [Thinal Dewnayana](#)  [Thinal Dewnayana](#)

Professional Summary

Full-Stack Software Engineer with **3+ years of hands-on development experience** building and deploying scalable web applications. Possesses **1+ year of professional industry experience** across multiple organizations, contributing to both front-end and back-end systems. Proficient in modern frameworks, relational databases, and cloud-enabled tools, with a strong focus on writing maintainable, high-quality code that enhances business workflows. Currently pursuing a **B.Sc. (Hons) in Information Technology** at the Sri Lanka Institute of Information Technology (SLIIT).

Work Experience

Associate Software Engineer

October 2024 – Present

Board of Investment of Sri Lanka, Colombo, SL (OnSite)

Technologies: React, SQL, .NET

– BOI Gateway

- * Contributed to the development and maintenance of a national investor portal serving **10,000+ monthly users**.
- * Built and optimized front-end features using React to enhance user experience and accessibility.
- * Developed and integrated secure .NET backend services for efficient handling of investor applications.

Associate Software Engineer

Aug 2024 – Present

O3Dynamix Pvt Ltd, Colombo, Sri Lanka (Remote)

Technologies: React, Node.js, Express, MySQL, Python

– JSK Forwarding Company System

- * Designed and developed a full-stack MERN application to streamline forwarding and logistics operations.
- * Implemented responsive React interfaces and optimized MySQL queries to improve system performance.

– Asanka Graphic Printing Management System

- * Built a MERN-based web system for managing orders, customer records, and print job tracking.
- * Handled end-to-end development including database schema design, REST APIs, and front-end implementation.

Projects Experience

RadioOneAI – AI-Powered Radiology Platform | Python, Deep Learning, Computer Vision

- Developed AI models for brain tumor detection, severity scoring, and vision-language reporting using MRI data.
- Worked with object detection and segmentation models including YOLO and transformer-based architectures.
- Integrated explainability techniques to support clinical decision-making.

AuraLink – Smart Desk Assistant Bot (IoT) | Python, IoT, AI

- Built an AI-powered smart desk assistant integrating IoT sensors for automation and contextual responses.
- Implemented task automation, voice-based interactions, and real-time device control.

Autonomous Navigation of TurtleBot3 | ROS, Python

- Implemented autonomous navigation using SLAM and path-planning algorithms on TurtleBot3.
- Enabled obstacle avoidance and real-time mapping in simulated and physical environments.

Kandyan Studio Website | MERN Stack

- Developed a customer care and loyalty management website using MongoDB, Express, React, and Node.js.
- Contributed to database design, UI/UX development, and automated report generation.

StackworkX Website | Java, MySQL, CSS, JavaScript

- Built a stack management system as a second-year group project.
- Handled database schema design, wireframe creation, and feature development.

Ceft Banking Website | *HTML, CSS, JavaScript, PHP*

- Developed a banking web system for checkbook requests, reviews, and customer ratings.
- Implemented frontend interfaces and backend form handling as a first-year group project.

MathMinder – Todo Mobile App | *Kotlin, Android*

- Developed a task and reminder mobile application as a first Android project.
- Implemented CRUD functionality, local storage, and clean UI layouts using Kotlin.

Lost and Found Management System | *Web Application*

- Built a system to report, track, and manage lost and found items digitally.
- Enabled user submissions, status tracking, and administrative review features.

Education

B.Sc. (Hons) in Information Technology

2022 – Present

Sri Lanka Institute of Information Technology (SLIIT), Colombo, Sri Lanka

Specialization: Information Technology

Innovations

Accident Preventing Nose Bot (APNB) | *Patent Pending*

2020 – Present

- Designed an accident-prevention robotic system focused on enhancing safety through automated sensing and response mechanisms.
- Currently under patent review, demonstrating originality and real-world applicability of the innovation.

CNC Writing Machine

2017

- Programmed and developed a CNC-based writing machine capable of automated text writing with high precision.

Skills

Programming Languages: Java, JavaScript, Python, C#, PHP, Kotlin, HTML, CSS

Backend Technologies: Spring Boot, Node.js, Express.js, ASP.NET, REST API Development, API Versioning

Frontend Technologies: React.js (Vite, Context API, React Query/TanStack), JavaScript

Databases: MySQL, PostgreSQL, MongoDB, Oracle

DevOps & Containerization: Docker, Docker Compose, Spring Boot Docker Compose

API Documentation & Migration: Swagger, Spring REST Docs

Cloud Platforms: AWS (EC2, S3, IAM), Google Cloud Platform (Gemini AI API)

Tools & Version Control: Git, GitHub, Visual Studio Code, IntelliJ IDEA, Android Studio

Methodologies & Platforms: Agile (Scrum), UML, Windows, Linux

Awards & Certifications

Multicloud Network Associate – Aviatrix

Python (Basic) Essential Training – HackerRank

Java Programming Master with Distinction – Evotech Education

Problem Solving Essential Training – HackerRank

C# Essential Training – HackerRank

Angular (Basic) Essential Training – HackerRank

Angular for Intermediate – SoloLearn (*In Progress*)

Front-End for Beginners – SoloLearn (Google Team)

C# for Intermediate – SoloLearn (Google Team)
